PROFILE

Versatile Full Stack Developer with 4+ years of hands-on experience in building scalable web applications using React.js, Next.js, Node.js, JavaScript, and TypeScript. Experienced in developing SaaS platforms, document management systems, electronic signature workflows, real-time applications, and AI-powered solutions. Strong expertise in REST APIs, cloud deployment, system integration, performance optimization, and delivering enterprise-grade products in agile environments.

EDUCATION

- Gujarat Technological University – Ahmedabad, India
- Bachelor of computer application and Master of computer application.
- Relevant coursework: Web Technologies, Data Structures, Algorithms, Machine Learning, etc

SKILLS

- **Frontend:** React.js, Next.js, JavaScript, HTML5, CSS3, Bootstrap, MUI
- **Backend:** Node.js, Express.js, REST APIs, GraphQL
- **AI/ML:** Langchain, TensorFlow, OpenCV
- **Tools & Cloud:** Git, Linux, GCP, Vercel, AWS, n8n, crewAI
- **Database:** SQL, Firebase
- **Others:** Real-Time Apps, WebSockets, Google Maps API

EXPERIENCE

OneClick IT Consultancy Pvt. Ltd. – Ahmedabad, India

Apr 2022 – Present

- Developed and maintained full-stack solutions for white-label SaaS platforms in travel, safety.
- Led development of **OC Travel**, a white-label travel platform with seamless flight booking and travel package management using Next.js and React.
- Built **TrackingAPP**, a safety app with real-time Google Maps location tracking and emergency messaging.
- Designed **Baymax**, a healthcare chatbot offering multilingual responses using AI integration and custom APIs.
- Created real-time transcription and recording tools for Google Meet with multilingual support using WebSockets, Whisper, and Python. Create (POC)
- Mentored junior developers and implemented agile practices for faster release cycles.

PROJECTS

- **Document eSignature Platform**

Developed and maintained a SaaS-based document eSignature platform that enables secure digital document workflows and electronic signing processes. Built modules for document upload, signer management, signature workflows, audit trails, public document verification, user authentication, and real-time status tracking.

- **AI Itinerary Management System – Travel Planner Agent**

Developed an AI-powered itinerary generation system that automatically creates travel plans based on user preferences. Built using Python, LangChain, and LLaMA (local model) to ensure full data privacy and offline capability. Implemented intelligent routing, budget-aware planning, and real-time activity recommendations. Designed modular agents for destination analysis, day-wise itinerary creation, and travel tips. Enhanced user experience by providing structured JSON itineraries ready for integration into web or mobile apps.

- **Baymax – AI-Powered Healthcare Chatbot**

OneClick IT Consultancy Pvt Ltd | 2025

Developed a personal healthcare assistant chatbot providing 24/7 support. Integrated LangChain for AI responses and built frontend using React. Enabled features like health queries, habit tracking, and conversational wellness guidance.

- **Chatbot – Web-based Conversational Assistant**

OneClick IT Consultancy Pvt Ltd | Jan 2022 – Apr 2022

Created a chatbot interface using vanilla JavaScript, React.js, and Node.js.

Designed conversation flows, fallback handling, and front-end integration for seamless user interactions. Focused on creating reusable components for future bot use cases.

- **Travel Domain project – White-Label Travel Booking Platform**

OneClick IT Consultancy Pvt Ltd | Aug 2024 – Present

Built a white-label travel web application using React.js and Next.js. The platform allows businesses to rebrand and offer flight bookings and travel packages. Developed key modules including flight search, itinerary management, and user dashboard with responsive design and real-time API integration.

- **Tracking App – Emergency Rescue Admin Panel**

OneClick IT Consultancy Pvt Ltd | Apr 2022 – Oct 2024

Developed an admin panel to monitor rescue device users during emergencies.

Integrated Google Maps to track real-time location of users and implemented messaging features for alerting responders. Focused on performance and accuracy of location data using React.js and Bootstrap.

- **Event Booking Platform**

OneClick IT Consultancy Pvt Ltd | Jun 2022 – Dec 2024

Created a curated online marketplace for design brands using Next.js, Bootstrap, and HTML/CSS. Enabled users to discover and book experiences with smooth navigation and responsive design. Ensured scalable UI components and optimized page Performance.

- **Social Platform Admin Panel**

OneClick IT Consultancy Pvt Ltd | Apr 2022 – Jan 2024

Worked on multiple modules of the admin dashboard for a social media application. Created moderation tools, post management, and user activity logs. Used React.js and Bootstrap to ensure consistency across modules and maintain design standards.

- **TracPoint – Fleet and Asset Tracking System**

OneClick IT Consultancy Pvt Ltd | Apr 2022 – Aug 2023

Developed an asset tracking admin panel for logistics companies. Integrated real-time GPS data, vehicle status monitoring, and alert systems. Focused on performance optimization and data accuracy. Built UI components with React.js and managed API calls efficiently.

- **Sport APP – Badminton Live Scoreboard**

OneClick IT Consultancy Pvt Ltd | 2024 – 2025

Developed a real-time scoreboard application for badminton tournaments using Next.js and Bootstrap. Built admin features for live match updates and score entry. Ensured fast UI updates and mobile responsiveness for better viewer experience.

ACHIEVEMENTS

- Received “**Employee of the Month**” award twice at OneClick IT Consultancy Pvt. Ltd. for consistent performance and timely delivery across key projects.
- Earned **5+ formal appreciations** from management for contributions to high-impact client projects, proactive issue resolution, and mentoring new team members.
- Successfully deployed **3+ production-grade web applications**, including white-label platforms, real-time systems, and AI-integrated tools.
- Recognized for leading internal project initiatives that improved code quality, team productivity, and release cycle speed.
- Helped improve customer satisfaction by enabling quick UI fixes and feature rollouts during critical client feedback loops.
